To Whom It May Concern

This is a letter of recommendation for Mr. Muhammad Sherjeel Akhtar who was a student in my course, CS302 Design and Analysis of Algorithms.

Sherjeel did well in the said course, securing B grade. His presentations showed that he is very good in terms of teamwork, co-operation and working with different people under high pressure and tight time constraints.

Overall, I think he is a good candidate for higher studies and would be a valuable addition to your prestigious university.

In case of any further queries, feel free to contact me.

Sincerely,

A handwritten signature in blue ink, consisting of a series of loops and a long horizontal stroke extending to the right.

Mr. Fazl-e-Basit

Assistant Professor

National University of Computer and Emerging Sciences – FAST
